HOW DUBLIN ZOO IS SUPPORTING WILDLIFE CONSERVATION WORLDWIDE

Dublin Zoo's purpose is to save wildlife and inspire a passion for nature.

We work with a global network of Conservation Partners to save threatened species and habitats. These organisations work in close collaboration with local communities and stakeholders across more than 20 countries to secure a better future for wildlife and people.

The maps displayed here show the Conservation Partners we work with in Ireland and around the world.

1. **Sphenisco** — Species: Humboldt penguin
