A habitat is a place
where an animal
lives. It can be as
small as a leaf or as
big as an ocean!

MAKE YOUR OWN MINI ZOO HABITAT

You can use anything you can find at home.
Here are some examples:

- Cereal box
- Scissors
- Glue
- Tape
- String
- Paint
- Lego
- Sticks
- Leaves
- Stones
- Sand
- Rocks and pebbles
- Toy animals
- Modelling clay

When you are designing your habitat be sure you
have the following things planned into your design:

THE ANIMALS SHOULD HAVE:

- access to food and water
- a place to shelter
- lots of space to display their natural behaviours

WRITE DOWN SOME OF YOUR DESIGN IDEAS HERE

IDEA!

Why not try to make the animals to go into the habitat too. Maybe you could create a habitat that different animals could share just like the zebra, ostrich and giraffes share the African Savannah at Dublin Zoo!

DON'T FORGET TO SHARE PICTURES OF YOUR MINI ZOO HABITATS WITH US!

Giraffes tongues
are purple-blue so
that they don't get
sunburned in their
hot habitat.
